About us

Minihosting Technologies was established at the beginning of 2022 in Cairo with clear emphasis in website designing, graphic designing, web hosting, domain registration, network administration, training and ICT consultations utilizing over 25 years of Information Technology experience.

The company’s passion promises longevity in innovative service provision. We aim to provide quality orientated products and services to each and every client that we serve. Our target is to deliver technology-based solutions to individuals, small and medium business, and other non-technical professions within Cairo and the rest of the Egypt.

We are striving to provide world class Information and Communication Technology (ICT) products and services to our clients. We have professionals who are innovative and creative in providing these classic ICT products and services in Egypt and abroad.

Our Vision

To become a leader in providing best ICT innovative products and services to various industries.

Mission statement:

To exceed the anticipation of our clients in service provision and product innovation so that customer satisfaction and retention is achieved.

To overwhelmingly and optimistically influence the shape of Egypt’s ICT services and beyond.

Our Values

Integrity: we ensure honest deals with our clients,

Professional: we ensure innovation in product and service provision so that our clients go with latest and up to date technology,

Effectiveness: we ensure our services are valuable, effective and efficient,

Timely: we ensure we meet deadlines in discharging our assigned duties so that our clients get our service timely without compromising on quality

Our Products and Services

Website Development

We develop world class websites for your company so that you can expose your brand to the world for wide recognition. We develop introductory, static, dynamic, corporate, and eCommerce websites that you may be interested in to meet and suite your needs as our client.

Graphics Design

We focus on communicating a message visually. Each project a graphic designer works on will have a unique message and a desired result from that message. The message may be to provide information, invoke thought, sell a product or even stimulate meaningful conversation.

Domain Name Registration

We Register website domains for individuals, companies or organizations who wish to have websites and expose their brand to the outside world.

Website & Email Hosting

We Provide website and email hosting services. We configure our emails so that they can be accessed anywhere around the world with high level security and other features which makes them easier to use.

Network Administration

Our hosting plans include Administration Support to ensure stable operation of the network. This includes (but not limited to) planning, developing, installing, configuring, maintaining, supporting, and email accounts.

Training

We provide Training in different software that you need your employees to be trained in. Some of the software that we provide training (but not limited to) are: Wordpress, Sitepad for Website Design and Development, Shopify, WooCommerce for eCommerce.

Operation Support

After completing the training, we support our client during his first operation period to ensure full productivity, efficiency, and benefit most from the delivered product.

ICT Consultancy services

We provide ICT related consultancy services to companies' individuals, Organizations, institutions and many more.

Hosting with us

Cloud Hosting Built with Care

In a world of ready-made hosting solutions offering similar performance, we've built our own hosting platform from the ground up. It works in perfect sync with our server hardware, ensuring cross-the-board performance improvements for all sites hosted with us.

Don't settle for less. Strive for excellence. Scroll down to see what makes us different.

Our Hosting Advantages

SSD STORAGE

SSDs outperform HDDs in just about every aspect. This is why all our servers are equipped with lightning-fast & ultra-reliable SSD drives guaranteeing supersonic performance for all your sites and apps.

DATA COMPRESSION

On all our servers we use the ZFS file system, which makes writing and reading data fast and which will dramatically speed up your dynamic websites and demanding apps.

DATA BACKUPS

We have developed a super-efficient data backup solution, which backs up all of your files on a daily basis. You will be able to restore not only an older version of a given file, but also a full backup of your account.

HARDENED SECURITY

We have worked hard to create a secure environment for your sites. The mod_security firewall, which is enabled by default, comprises a comprehensive set of security protection rules. You can restrict the outgoing traffic from your account via your Control Panel.

TOP-OF-THE-LINE SERVER HARDWARE

A top-level hosting platform goes hand in hand with top-level hardware. We use only enterprise-grade server and network hardware components and each component is thoroughly tested before being introduced into our production environment.

Our Hosting Plans Features

SSD STORAGE

SSD drives provide better I/O rates and nearly 100 times faster access time.

DATA COMPRESSION (LZ4)

LZ4 compression allows for smaller write I/O burden and faster write speed.

BACKGROUND PROCESSES

Native support for scripts running in the background on a web hosting account.

PHP MEMORY ALLOCATION

Each account has a PHP memory allocation of 2 GB to ensure server stability.

MAX PROCESSES QUOTA

Each account has a Max Processes Quota of 100 simultaneous threads.

MYSQL CONNECTIONS QUOTA

Each account allows for 20 simultaneous connections to a MySQL database.

PHP SETTINGS

You can switch between different PHP version or modify the PHP.ini file easily.

PYTHON SETTINGS

You can switch between Python 2.7, 3.5 and 3.7 with ease.

BANDWIDTH REDUNDANCY

Servers come with 2-4 Gbps of bandwidth to prevent network channel overload.

VERSION CONTROL SYSTEMS (GIT, SVN)

Full Git and SVN support without the need to install any additional software.

Domains Names

Why you Need a Domain Name?

Your domain name, i.e. your online address, is, in essence, your digital ‘identity card’ - the first thing people will see and recognize you by. With mobile Internet usage steadily growing and attention spans getting shorter and shorter, registering a domain name that is easy to discover and remember is becoming more and more crucial for building a successful online presence. At Minihosting Technologies, you will find a wide array of domain extensions. We are partnering with multiple ICANN-accredited registrars, which allows us to choose where to get a specific TLD from. This is also the reason why you will find our domain registration prices among the lowest on the Internet. Plus, the ICANN accreditation speaks for itself - it means that you are dealing with a reputable partner. As soon as you’ve registered a domain with Minihosting Technologies, you’ll gain access to our advanced Domain Manager interface, which allows you to control everything domainrelated - from WHOIS info updates to DNS record modifications. Plus, you’ll be able to manage multiple domain names at the same time with ease.

WHY Minihosting Technologies:

- A Wide Variety of TLDs
- Simple Multi-Domain Management
- Easy DNS Controls
- Fast WHOIS Management
- Unlimited Parked Domains
- 24/7 Support

Affordable Domain Names

Here, you will get an affordable domain name for your website, picking between over 50 generic and country-code domain extensions. With the convenient to use Domain Name Manager, it’s possible to manage all of the adjustments of your domains from just one place. It will be easy to alter your WHOIS information, to make custom DNS records, to park domains and many more.

Get a brand-new domain name for your website from Minihosting Technologies at an exclusive price today and take advantage of our intuitive Domain Manager, which guarantees you a seamless, single- and multi-domain management experience! Enjoy full control over all your WHOIS and DNS records!

SSL Certificates

▶ SSL Services with Minihosting Technologies

SSL Certificates are the easiest way to add the web's most trusted security layer to your website. An SSL certificate places an extremely valuable security layer to your site. If you are the owner of an online shop and get fees, then an SSL Certificate is truly a must-have because it can enormously add to the customer's trust in your web site.

With Minihosting Technologies, you can get your new SSL Certificate directly from your personal web hosting Control Panel. Of course, if your domain name is hosted here, we can instantly install the SSL Certificate on your behalf. No other setup or manual setting are required.

Apart from the standard SSL Services, you can also get a Wildcard SSL certificate. A Wildcard SSL Certificate can be linked to many different hostnames simultaneously. This is very handy should you want to secure an array of sites all at once.

SSL Services, either regular and wildcard, available from Minihosting Technologies, have an authentic 2048-bit encryption in addition to a \$10,000 USD warranty. You can get an SSL certificate with all Minihosting Technologies's web hosting services – Linux shared hosting, VPS web hosting, semi-dedicated hosting, and dedicated servers hosting.

▶ Why to get Your SSL Certificate from Minihosting Technologies?

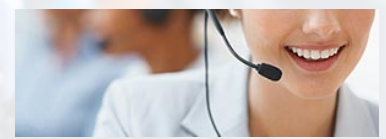

Simple to Get

Finding a brand-new SSL certificate is very simple. Everything you need to perform is complete the submission form within your Hosting Control Panel. No reason to apply for an account using a third-party corporation, there's no need to wait for several days for your personal SSL to become completely ready.

Easy to Install

We have for good and all taken off the need for yourself setting up any kind of SSL Services for your personal web sites. If a domain name is hosted with us, you'll have your SSL certificate automatically put in and configured to work, without resorting to any regular adjustments on your end.

24x7 Support

When you have a concern or need assistance whilst setting up your SSL certificate, we're available for you. The 24x7 support includes professional tech specialists and is available round-the-clock. In addition, the normal reply time frame is lower than 20 min.

Self Managed Professional Hosting

Professional Plans

Professional hosting plans include Shared Hosting, OpenVZ Virtual Private Servers (OpenVZ VPS), KVM Virtual Private Servers (KVM VPS), Semi Dedicated Servers, Dedicated Servers, Domain Name Registration and SSL Issuance.

We at Minihosting Technologies uses a custom hosting platform, which can provide regular users with some benefits, usually reserved for virtual or even dedicated servers, such as native support for Memcached and Varnish, the ability to run and manage running background processes, support for PostgreSQL databases, Git and SVN support, etc.

It is built using the ZFS file system, which allows for a strong file compression, effectively reducing the file size of all files hosted with us. ZFS also has a native silent data corruption protection, something invaluable for hosting providers. Users are hosted on fast SSD drives, which allows for much improved I/O rates when compared with regular hard drives. Thanks to the ZFS file system and the SSD drives, we don't have a file quota or I/O limits for our users. Mod_security is enabled by default, with an even-expanding set of rules, designed to automatically protect your sites.

You can also choose where to host your websites - we offer multiple data centers, located across USA, Europe and Australia.

All our professional services can be provisioned directly by our clients from our web site.

SERVICE GUARANTEES

- **24/7 Technical support**
- **1-hour response time guarantee**
- **99.9% Network uptime**
- **99.9% Service uptime**
- **Anti-virus protection**
- **Multiple daily data backups**

Self Managed Professional Plans

Professional Shared Hosting Plans

For our professional technical clients, we've created a ZFS-driven shared hosting platform with SSD-equipped servers and an anti-hacking firewall software application, because we want your web sites to be as successful online as possible. Owing to the data compression algorithm that we are using to store your content, your websites will be delivered faster to the people. In addition, we offer exceptional anti-malware protection software and browsable backups, so you'll enjoy ironclad data security.

Self Managed Professional Plans

Shared Hosting

In addition to the above specifications, all our Professional Shared Hosting Plans include the following features completely free.

Domains & Subdomains

- Unlimited Parked Domains
- Full DNS Management
- Custom MX and A records
- CNAME Records
- SRV Records
- AAAA Records
- NS Records
- Registrar Lock
- TXT Records
- Full WHOIS Management
- EPP Transfer Protection
- Feature-rich Domain Manager
- Domain Backorders

E-Mail Features

- SMTP Server
- Webmail - RoundCube
- E-Mail Forwarding
- Auto-responder E-Mails
- Catch-all e-mails
- Mailing List Members
- SPAM Filters
- DomainKeys Identified Mail
- SPF Protection
- Anti-Virus protection
- Advanced Email Manager

Security

- ModSecurity Firewall
- Let's Encrypt SSL Certificates
- Self-signed SSL Certificates
- JailHost
- DNSSEC
- IP Blocking Tool
- Hotlink Protection
- Password Protected Directories

Customer Support

- 24/7 Technical Support
- Phone Support
- Live Chat Support
- Videos Tutorials
- Extensive Online Documentation
- Integrated Ticketing System
- One-Hour Response Guarantee

Scripting and Databases

- APC (PHP Opcode Cache)
- PHP4, PHP5 and PHP7 Support
- Over 3400 Perl modules
- Version control (Git, SVN)
- Perl Scripting
- Python
- phpPgadmin
- PHPMyAdmin
- Server Side Includes (SSI)
- Zend Optimizer
- IonCube
- Microsoft FrontPage Extensions
- Dreamweaver Compatible
- ImageMagick & GD Library

1-click Apps Installer

- WordPress
- phpList
- Textpattern
- Drupal
- Geeklog
- Joomla
- Mambo
- Moodle
- php-fusion
- Xoops
- phpBB2
- Simple Machines Forum
- OS Commerce
- OS CommRes
- DOTproject
- 4images Gallery
- Coppermine
- DokuWiki
- Piwigo
- Abante Cart
- Maian Cart
- Church CRM
- Live Helper Chat
- Mautic
- Open Real Estate
- SuiteCRM
- phpCollab
- Form Tools
- LuxCal
- Podcast Generator
- Revive Adserver

Site Management Tools

- Multilingual Control Panel
- FTP Manager
- File Manager
- Custom Error Pages
- .htaccess Generator
- URL Redirector

Site Statistics

- Web / FTP Statistics
- Access Log Manager
- Error Log Viewer
- MySQL / Load Stats

OS, Connectivity & Backup

- 24-core servers w/ 64gb RAM
- Stable Linux with Apache
- 2.5 Gbits Network Adapters
- Daily data back-up
- UPS & diesel back-up generator

Free Bonuses

- Instant Account Activation
- Website Migration
- 1-click Apps Installer
- Online Website Builder
- FREE Website Templates
- Browsable Daily Backups
- Dropbox Backup
- SSD Data Caching
- SSD Data Caching
- Website Accelerators
- ZFS Storage
- Shared SSL IPs

OpenVZ Self Managed VPS Hosting

OpenVZ VPS Hosting

OpenVZ is an OS-level virtualization technology, which allows the kernel of the host Operating System to be shared amongst different containers, or Virtual Private Servers. The main difference between OpenVZ and other virtualization platforms like KVM is that with OpenVZ, the VPS itself is actually "aware" that it's a virtual machine.

The main advantage of OpenVZ is that since the virtualization overhead associated with traditional hypervisors is absent, OpenVZ virtual servers enjoy higher-speed disk access and lower disk latency. This high-performance, low-upkeep, I/O bottleneck-free service is very popular among hosting providers.

One disadvantage of OpenVZ servers is that they are more susceptible to the "noisy neighbour" effect. At Minihosting Technologies, we have taken multiple steps to further isolate the different OpenVZ servers from each other, so as to prevent inter-server interferences.

OPENVZ ADVANTAGES

- No I/O bottlenecks
- Lower disk latency
- Higher-speed disk access
- Scaling without rebooting
- Fast deployment
- No SWAP partitioning

OS OPTIONS

- CentOS (64 bit)
- Debian (64 bit)
- Ubuntu (64 bit)

CP OPTIONS

- Hepsia Control Panel
- cPanel Control Panel
- DirectAdmin Control Panel

LOCATION OPTIONS

- SteadFast, USA
- Pulsant, UK
- Pori, Finland
- Sofia, Bulgaria
- Sydney, Australia

KVM Self Managed VPS Hosting

KVM VPS Hosting

The acronym "KVM" stands for "Kernel-based Virtual Machine" – a virtualization technology that has taken advantage of the hardware virtualization support offered by many newer Intel and AMD processor models. Baked right into the kernel of the host Operating System, giving it native virtualization capabilities, KVM provides better performance than virtualization technologies that rely on hosted hypervisors running in conventional OS environments.

Native hypervisors run directly on the host machine's hardware, which means that KVM virtual servers have direct access to the resources offered by the physical host. And since requests are sent directly to the hardware, there's no need for an additional software layer either. This means less overhead and less virtual machine-generated load.

Experiments have demonstrated that the performance of a properly configured KVM with VirtIO drivers is almost the same as that of an identically configured dedicated server, with the KVM being outperformed by a mere 3%.

KVM ADVANTAGES

- Support for multiple OSs via ISOs
- Improved virtual machine separation
- Enhanced security thanks to SELinux
- No SWAP partitioning
- Guaranteed CPU speeds
- Real RAM shares

OS TEMPLATES

- CentOS (64 bit)
- Debian (64 bit)
- Ubuntu (64 bit)

OS ISOs

- Fedora (64 bit)
- FreeBSD (64 bit)
- LinuxMint (64 bit)
- Scientific Linux (64 bit)

Become part of Minihosting Technologies today! Get a brand new KVM Virtual Private Server and experience the hosting freedom and the countless possibilities this incredible service is offering!

Self Managed Dedicated Servers

▶ Why Choose a Dedicated Server?

If you aim to build a successful online business, you should choose neither a shared hosting account (because you will soon outgrow the available resources) nor a Virtual Private Server (because it would just be a stopgap solution). What you really need is a dedicated server – the only hosting environment that can guarantee you absolute hardware and software freedom, full root access, rock-solid, bullet-proof network connectivity and unmetered CPU resources at the same time.

A dedicated server will allow you to install any OS that you want and to add more RAM or more disk drives to the server without having to upgrade like you would have with any other hosting solution. Hardware-wise, a dedicated server is the only platform that allows you to set up a RAID array, provided that you have more than one disk drive.

WHY Minihosting Technologies:

- 99.9% Network Uptime
- 24/7 Technical Support
- 1-hour Response Time
- Full Root Access
- Free Bonuses
- A US Data Center
- No Setup Fees

▶ Intel ATOM Dedicated Servers

The Intel Atom servers run are created to run in a low-powered environment. This means that they are designed to be extremely efficient when running any sort of task. This makes them an ideal home if you want to have a dedicated server that will power only a single website or will be a part of a cluster.

INTEL ATOM SERVER

	CPU	RAM	DISK SPACE	MONTHLY TRAFFIC	PRICE
Atom 2c	Intel Atom D525 1.8 GHz (2 cores)	4 GB	2x240 GB SATA SSD	10 TB	\$45.00/mo

Self Managed Dedicated Servers

Intel XEON Dedicated Servers

The Intel Xeon architecture is made precisely with servers in mind. If you plan to use your dedicated server for a reseller hosting base, or to create virtual servers, it's the best possible choice. Additionally, thanks to the large number of CPU cores and higher clock speed, video transcoding on these servers is a breeze.

INTEL XEON SERVERS

	CPU	RAM	DISK SPACE	MONTHLY TRAFFIC	PRICE
Xeon E3 v5	Xeon E3-1240L V5 2.10 GHz (4 Cores)	16 GB	2x240 GB SATA SSD	10 TB	\$90.00/mo

Xeon Scalable 48c	2x Xeon 5220R/similar 2.3 GHz (48 Cores)	128 GB	2x480 GB NVMe	20 TB	\$552.00/mo

Managed Services

Managed Services

Managing a dedicated server all by yourself can be a challenging task, with so many things that will require constant attention. If you are not experienced enough or if you want to focus more on building your website, we offer a Managed Services packages, designed specifically to take this load of your shoulders.

Managed Services package	
Weekly Backup	<input checked="" type="checkbox"/>
Weekly OS Update	<input checked="" type="checkbox"/>
Installation & Troubleshooting (30 min)	<input checked="" type="checkbox"/>

If you don't need a special suite of managed services, but require assistance with tricky script issues or complex application installation and configuration, we have an Installation & Troubleshooting package. With it, you can book one of our senior server administrators to help you with whatever issue you are facing.
